

Report to March 2022 Parish Council

NET ZERO WORKING GROUP REPORT

The initial meeting of the Net Zero Working was held on the 28th February 2022.

During this meeting the members of the working went through the terms and conditions to ensure that all members were clear and in agreement with these, no issues were identified. It was agreed that SCCAG and SCEN would be invited to put forward one member to join the Working Group in accordance with the Ts & Cs. Since this meeting SCCAG has appointed Mrs Susan Davies to the group.

It was agreed that the group would reach out to the community to determine if there are any other groups working on carbon reduction projects who would benefit from our support, an article has been submitted to the Old School News for publication in the next edition to publicise our existence and the support we can provide. We are making it clear that we are available to support regulatory and banking support for Net Zero Carbon projects, we are not a group to progress those projects.
